IQAC Action Taken Report on Feedback Analysis

Academic Year 2020-21 SEM-I

Based on the input from the stakeholders, feedback is a technique to comprehend the college's strengths and identify the areas that require more attention. Students, faculty, alumni, employers, and parents are listed as the stakeholders of higher education institutions by the National Assessment and Accreditation Council (NAAC). In this context, feedback is crucial for knowing what parents and students need from a higher education institution. The comments from alumni will help in identifying not only the areas that need to be improved but also the kind of assistance that is required for them and the current students to obtain employment or pursue further education.

Employers' feedback will aid us in understanding the discrepancy between what students are learning in the current curriculum and the skills required for employment. As members of the HEI, teachers can provide valuable insight into the curriculum's strengths and weaknesses, governance difficulties, and infrastructure.

The college has implemented the necessary actions, which are listed below, after carefully examining the feedback it received from various stakeholders.
